

MERCHANDISING SYSTEMS

Nu Displays has a wide range of in-stock and made to order merchandising solutions for both retailers, distributors, agencies and brands. Design to manufacture capabilities provides our clients with an end to end solution. Benefit from the highest return on investment with our high quality, long lasting merchandising systems designed specifically for the demanding retail environment.

MERCHANDISING STRIPS

Increase your merchandising capacity with a 12 hook merchandising strip to hold additional products in-store. Injection moulded out of durable plastic, the Nu Displays merchandising strip is a strong re-useable solution with a price indicator label. Each merchandising strip is also supplied with a small s-hook for easy application in-store.

Merchandising strips can be embossed with your brand logo for easier management in-store. A variety of colours are available. Minimum quantities apply to the embossing and certain colour options.

Dimensions

Overall length 780mm

Colours

PEG STRIPS

A merchandise strip with pegs rather than hooks. Each of the six pegs clamp light-weight products which may not have a punched hole or euroslot. Each 6 peg strip can be interlocked below one another to increase merchandise capacity. Peg strips are available in a range of colours and supplied with an s-hook for application on-shelf. Large and standard price/brand boards are clipped onto the S-Hook for branding and pricing communication.

S Hook - Standard	100mm	SHS 01
S Hook - Small	80mm	SHS 02

HANG TABS

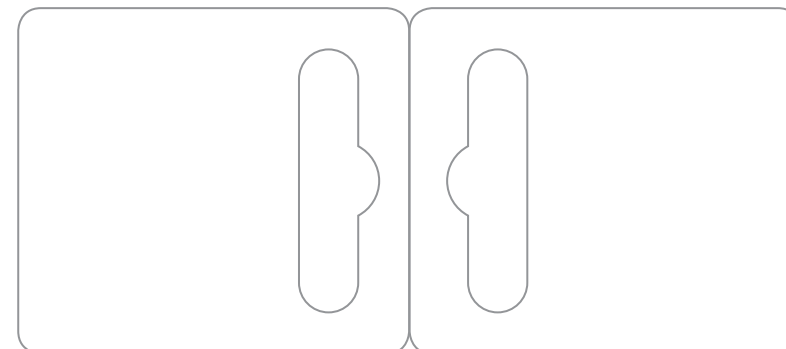

Hang tabs are a simple and cost efficient way to repair damaged packaging or to allow products without a pre-punched hole or euroslot to be merchandised from a merchandise strip or peg.

Double Sided Eurosot

Used for repairing torn packaging with an option to brand the hang tab.

Dimensions 104mm height x 40mm width

Product code EUROD 01

Delta Hole

Single sided hang tab used to facilitate hanging of products which have not been pre-punched with a hole or euroslot.

Dimensions 32mm height x 40mm width

Product code DELTS 01

Double and Single Sided Round Hole

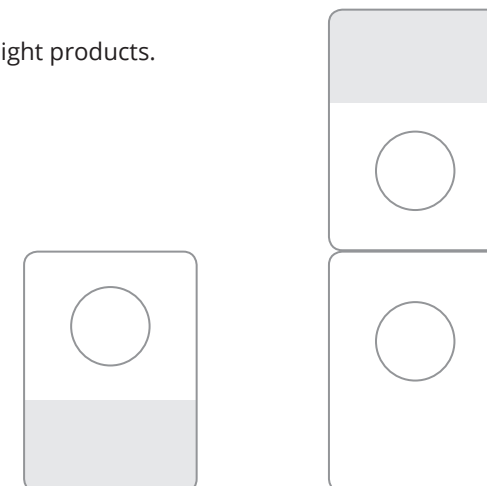

Used to repair packaging and facilitate hanging of products which have not been pre-punched with a hole or euroslot and ideal for lightweight products.

Dimensions 64mm height x 23mm width

Double Sided Round Hole DSRH 01

Dimensions 32mm height x 23mm width

Single Sided Round Hole SSRH 01

INLINE PUSHER SYSTEM

A highly efficient merchandising solution which automatically keeps your product 'front of shelf'. The system automatically moves product forward along the tray with each product removal resulting in a uniform and impactful shelf front product facing. Inline accommodates both 500ml and 1 litre bottles as well as cans.

Dimensions

70mm width x 650mm depth
(option to shorten depth)
